

Project Title:

API Testing Project using Postman - JSONPlaceholder

Prepared by:

Jainamkumar Mukeshbhai Mochi

Date:

4th July 2026

1. Introduction

Objective:

To learn and perform basic CRUD (Create, Read, Update, Delete) operations on a public REST API using Postman tool.

API Used:

JSONPlaceholder (Free Fake Online REST API for Testing)

Url:

<https://jsonplaceholder.typicode.com/>

Tools Used

Postman

2. Test Cases

Test Case ID	HTTP Method	Test Scenario	URL	Request Body (if any)	Expected Status Code	Actual Status Code	Status
TC-01	GET	Get All Users	/users	-	200 OK	200	Pass
TC-02	GET	Get Single User	/users/1	-	200 OK	200	Pass
TC-03	POST	Create New Post	/posts	{title, body, userId}	201 Created	201	Pass
TC-04	PUT	Update Existing Post	/posts/1	{title, body, userId}	200 OK	200	Pass
TC-05	DELETE	Delete Post	/posts/1	-	200 OK	200	Pass

3.Key Learnings

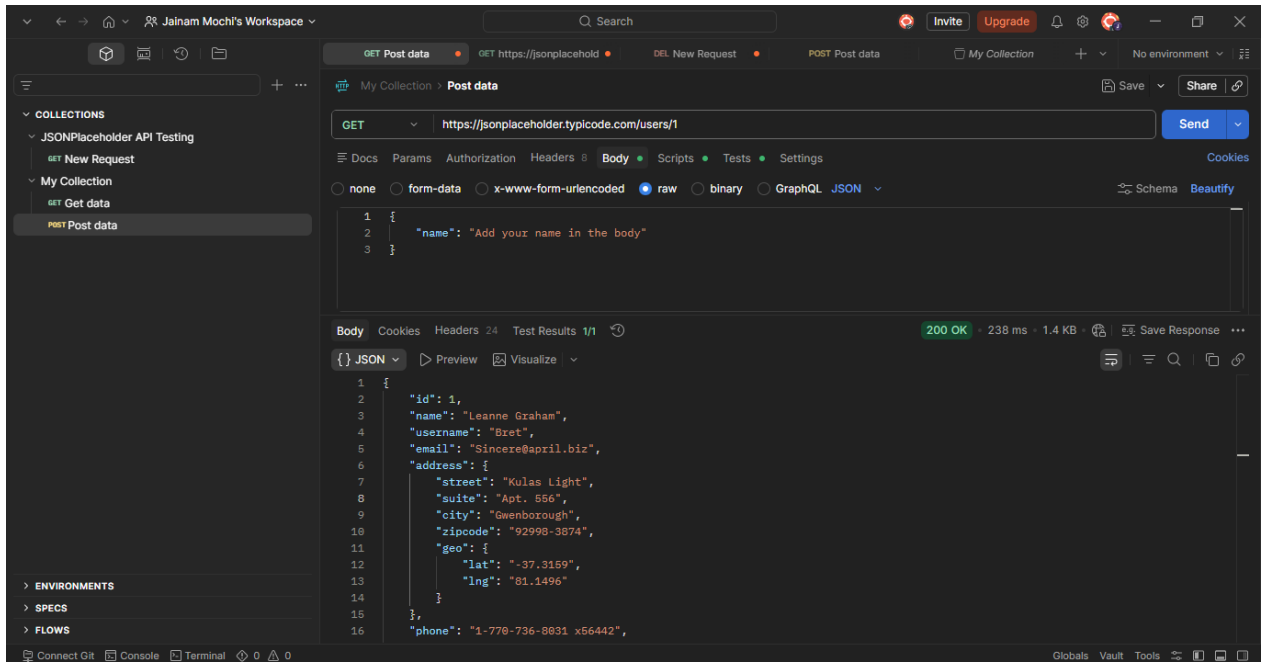

Understood different **HTTP Methods** and their purposes:

- **GET** → Retrieve data
- **POST** → Create new data
- **PUT** → Update existing data
- **DELETE** → Remove data

4.Screenshots

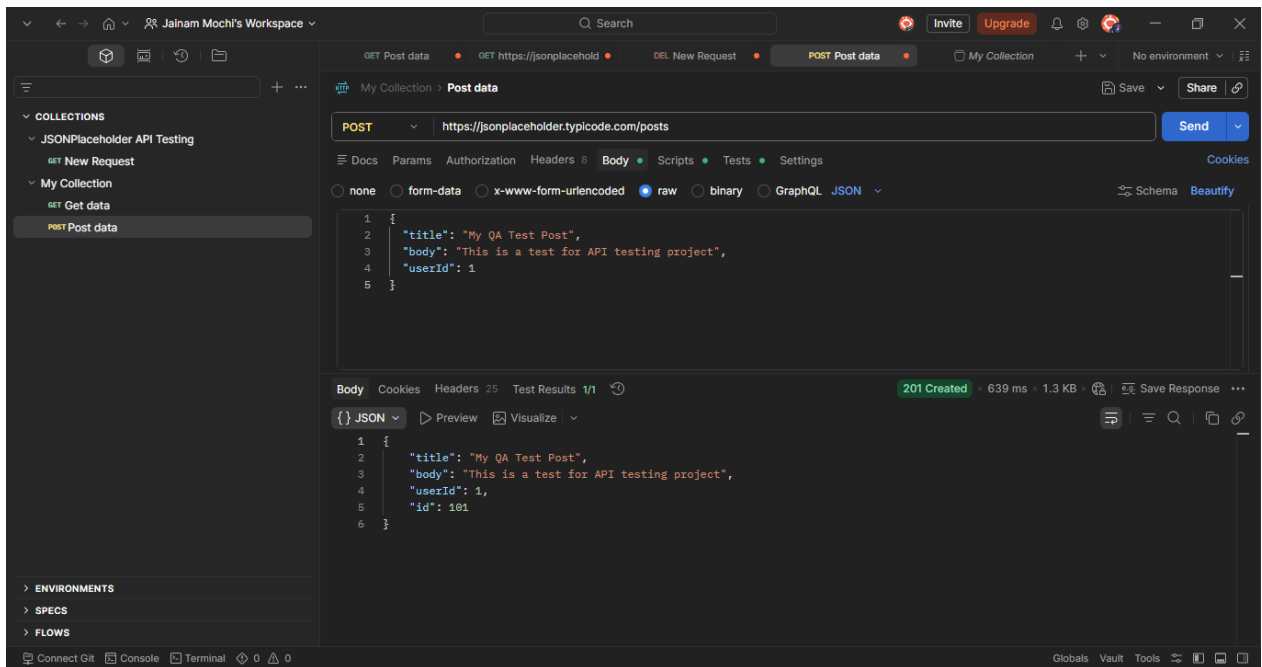

Request 1. Get Single User

- Method: **GET**
- URL: <https://jsonplaceholder.typicode.com/users/1>

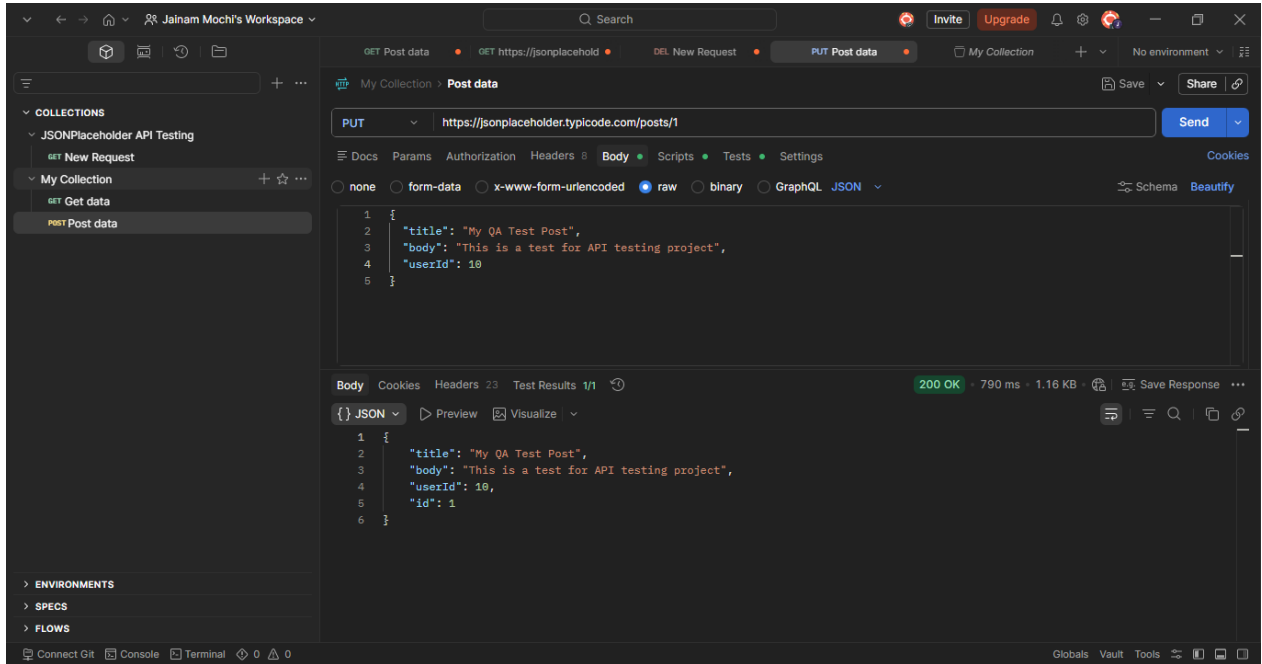

Request 2: Create New Post

- Method: **POST**
- URL: <https://jsonplaceholder.typicode.com/posts>

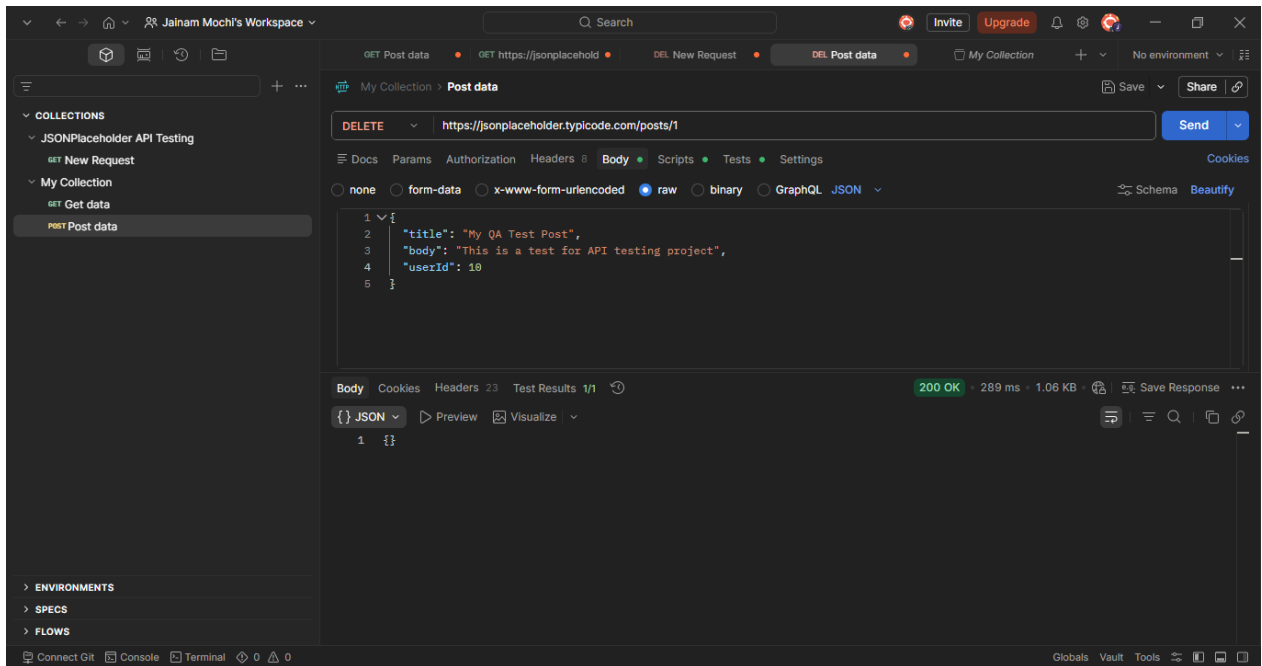

Request 3: Update Post

- Method: **PUT**
- URL: <https://jsonplaceholder.typicode.com/posts/1>
- Same Body as above (change title)

Request 4: Delete Post

- Method: **DELETE**
- URL: <https://jsonplaceholder.typicode.com/posts/1>

5.Conclusion

Successfully performed API testing operations using Postman. This project helped me understand backend testing concepts which is an important skill for QA Engineer role.
